PROFILE

IT support professional with hands-on first-line support experience across Windows, iOS and Linux, gained as the in-store point of contact for technology issues in a high-volume retail environment. Daily use of ServiceNow for incident logging, ticket escalation and follow-through, plus practical troubleshooting of printers, tablets, POS terminals and network connections while users are waiting and service is live. Experienced supporting people remotely with AnyDesk and TeamViewer, and working alongside an IT service desk to bring incidents to closure. After a technical education and early work in software development, I am deliberately building my career in IT support and service desk work rather than development, because the part I consistently do best and enjoy most is direct troubleshooting and solving problems face-to-face with the people affected. Advanced Diploma in Computer Programming & Analysis (GPA 3.7, Dean's Honours every term); CompTIA A+ in progress, expected December 2026. Seeking a permanent Help Desk or IT Support role.

TECHNICAL SKILLS

Support & Communication: Customer service and end-user communication, patience with non-technical users, user training and onboarding, clear incident documentation, calm under pressure during high-volume periods. English fluent; French — TEF Canada NCLC 4.

Service Desk: ServiceNow (incident logging, ticket lifecycle, escalation), Tier-1 end-user support, priority-based triage by business impact, incident documentation, user follow-up, Jira

Remote Support: AnyDesk, TeamViewer

Operating Systems: Windows 10/11, iOS/iPadOS, Linux (Ubuntu), macOS

Hardware: Desktops, laptops, tablets, receipt/label printers, POS terminals, peripheral setup, cable and connector diagnostics

Networking: Ethernet and structured cabling, TCP/IP, Wi-Fi and device connectivity, VPN, DNS/DHCP, routers and switches

Directory & Accounts: Active Directory (coursework/lab exposure)

Applications: Microsoft 365, enterprise web portals

EXPERIENCE

Chipotle Mexican Grill — Ottawa, ON

May 2023 – Present

In-Store Technology Support Point of Contact (formal title: Kitchen Leader)

- Acted as the in-store point of contact for all technology issues during live service, handling roughly 8–10 device issues per week across POS terminals, iOS tablets, receipt and label printers, Windows terminals and network devices — resolving problems in front of waiting customers and under time pressure, and covering more than one store location.
- Prioritised competing technical and operational problems by business impact during peak volume, restoring the most business-critical systems first and keeping service running while fixes were in progress.
- Resolved most issues on the spot during live service; logged and tracked incidents in ServiceNow, raising tickets only for problems that could not be fixed on site and following each one through to resolution.
- Escalated unresolved issues to the IT service desk with clear written documentation of symptoms and steps already attempted, then followed remote-guided instructions to complete the fix.
- Carried out first-line hardware troubleshooting: restarts, reseating cables and connectors, checking Ethernet connections, and reconnecting devices to bring them back into service.
- Trained and cross-trained a team of 20–35 crew members on equipment and system use in plain language, reducing repeat issues; supervised the team through peak service in a store ranked #1 for peak-hour throughput across East Canada operations.

Xenara Inc. — Mississauga, ON

Mar 2025 – Feb 2026

Software Engineer (remote)

- Investigated and resolved production issues reported by users.
- Set up the working environment on new team members' machines during onboarding, and wrote a step-by-step setup guide for future hires to follow.

Appy.yo — Vancouver, BC

Sept 2024 – Dec 2024

Full-Stack Developer Intern (remote)

- Investigated user-reported performance issues in a web application.

EDUCATION & CERTIFICATIONS

Advanced Diploma, Computer Programming & Analysis

Graduated Aug 2025

Algonquin College — Ottawa, ON · GPA 3.7 / 4.0 · Dean's Honours List, all terms · Class Representative for 50+ students

- Used AnyDesk to remotely help classmates resolve software setup, connectivity and configuration problems throughout the program.

Certifications: CompTIA A+ (in progress, expected Dec 2026) · Oracle Cloud Infrastructure 2025 Certified Foundations Associate · OCI 2025 AI Foundations Associate
